

## Heavy metal detoxification & ME/CFS.

12:30 PM on Saturday July 7<sup>th</sup>

ME/CFS Australia (WA) is hosting a presentation by Clinical Nutritionist Blake Graham, B.Sc (Honours).<sup>1</sup> The topic of discussion will be the relationship between heavy metals (e.g. mercury) and ME/CFS. Evidence for the link between heavy metals and ME/CFS and options for diagnosis and treatment will be discussed.

### ***Did you know that:***

- Hair analysis results in a high rate of false negatives and provoked urine testing is the gold standard diagnostic method?
- DMSA, DMPS and EDTA are the most effective treatment agents for heavy metals?
- Chlorella, commonly promoted for the treatment of mercury, has documented to not change the excretion of mercury via urine and stool?<sup>2</sup>

**LOCATION:** ME/CFS Australia (WA)  
Suite B, 11 Aberdare Road  
Nedlands, 6009

Phone: (08) 9346 7477  
Email: [mecfswa@cnswa.com](mailto:mecfswa@cnswa.com)

**COST:** Free for members of ME/CFS Australia (WA).  
Gold coin donation for non-members.

1. Committee member of ME/CFS Australia (WA).
2. Dr. David Quig, Doctor's Data Inc. "Lack of Effect of Chlorella Supplementation to Enhance Fecal Excretion of Mercury in Healthy Subjects with Dental Amalgams." (In preparation).
